

Summary of data below

See by postcode where kids got places in Sept 2006 but where they would have to have gone under the new proposals (this is coming in 2008!)
 1/3 or 645 kids based on the 2006 intake will be affected by the proposed changes, a huge amount for apparently a small problem
 The worst affected areas are deprived areas Moulsecocomb, Bevendean, Stanmer, Coledan and Portslade. Patcham and Westdene are also badly affected.
 Whitehawk and Hanover are the biggest gainers
 Queens Park and Regency don't benefit that much as the data shows they were not that badly affected anyway
 Queens Park is currently no worse of under the current system than Westdene with 13 and 9 kids directed respectively
