

Data for Postcode Catchment Area [\(Taken From From Brighton and Hove Council Website\)](#)

School Catchment	No of places available	Postcodes	Y5 Numbers Less CN average ¹	Y5 FSM % ²	Y4 Numbers Less CN average	Y4 FSM %	Comment
PCC	180	BN41 2	186	19%	184	18%	Allows for 'Greenwich Judgement'
Hove Park and Blatchington Mill	600	BN15, BN31, BN32, BN33, BN 34, BN35, BN36, BN37, BN38, BN41 1	601	20%	609	18%	Large enough statistically to allow for variations over time and sibling movement. Also makes sense of Hove Park having a second site in the Blatchington Mill area
Patcham High and Falmer	421 may reduce to 391 if an Academy	BN18, BN19, BN24	391	28%	393	23%	If Falmer becomes a 'postcode' Academy FSM will be significantly higher than in other areas
Varndean and Dorothy Stringer	548	BN11, BN12, BN13, BN14, BN16, BN17, BN20, BN21, BN23, half of BN25, BN29,	538	23%	523	22%	Includes half of BN25 thus increasing the area's proportion of FSM. Using a ballot may distribute FSM evenly. Distance measurement would almost certainly reduce FSM at Stringer and significantly increase FSM at Varndean
Longhill	240	BN26, BN27, BN28, half of BN25	259	20%	286	19%	Allows for 'Greenwich Judgement' ³ Includes East Saltdean and half of BN25. Not all of BN28 (33/39) is in B&H area.

¹ Cardinal Newman (CN) average intake based on last four years. It may be reasonable to assume that higher numbers may have a higher number of CN places? Total CN places deducted is 275. Actual places at CN are 340.

² FSM based on that year group census data January 2006

³ Greenwich Judgement prevent authorities from 'ring fencing' their boundaries. This would be an issue for East Saltdean but not so much for PCC as they border a different process where children transfer at 12 rather than 11 years of age.
